SUPPLEMENT TO REPORT NO.

1. The Inkar plant, which formerly belonged to Ing. Jan Karasek, was incorporated into the Tesla Works in April 1949. This plant is located at Chotutice near Pecky, with telephone number Radim 3. Ing. Karasek was retained to work at Tesla and has telephone number 810-98 or 819-10. He lives at Prague-Liben, Podlipneho 12.
2. The Inkar plant is engaged in the production of physical apparatus, including electrical measuring apparatus such as voltmeters, ammeters, and control tubes; industrial X-ray apparatus; electromagnetic testing installations; demagnetizing apparatus weighing 3-6 tons; and electric welding installations.
3. Most of the production, especially electrical-measuring and testing equipment goes to the USSR. Shipments are sent in freight cars from the Pecky railroad station to Moscow, Kujbisheva 169. During the first quarter of 1949, 5 demagnetizing apparatuses were shipped out. On 1 April 1949, shipments of electromagnetic testing installations and of industrial testing X-ray apparatus were begun. During the third quarter of 1949, an additional 5 demagnetizing apparatuses and 25 X-ray units are to be shipped to the USSR.
4. Electromagnetic testing units, especially those used to check large machine parts such as gun barrels and crankshafts, weigh up to 6 tons and are thus shipped in parts weighing up to 600 kilos; they are shipped in wooden packing cases which are supplied by the firm Miroslav Javurek.\* The following cases were provided by this firm in May 1949:

No. of Cases	Size of Case in cm.
15	150 x 75 x 75
1	183 x 172 x 62
1	80 x 80 x 80
1	80 x 50 x 45
2	200 x 100 x 70

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States. Next Review Date: 2003

5. In February 1949, shortages in the following items used especially in the manufacture of demagnetizing and X-ray apparatus caused a bottleneck in production:
- Wooden veneers (5 and 10 mm. thick) and panels (20-25 mm. thick) used in the manufacture of dashboards for demagnetizing apparatus.
  - Timber, 0.2 cu.m., used in demagnetizing units; 1.0 cu.m. used in X-ray apparatus.
  - Industrial gasoline for cleaning parts of X-ray units. (On 1 February 1949, 300 kilos of industrial gasoline were required.)
6. In March 1949, the following numbers of persons were employed:

	<u>Clerks</u>	<u>Workers</u>	<u>Apprentices</u>
Men	21	77	24
Women	10	9	—

25X1A [ ] Comment. The Prague telephone directory lists Miroslav Javurek, wood industry and wholesale packing materials, at Prague X, Maniny, telephone 63107, 61583. His home address is given as Prague X, Havlickova 3, telephone 25904.
